Thank you for choosing Signature!

Since we began our work to promote and teach British Sign Language (BSL) in 1982, we've supported more than 440,000 people to both learn BSL and communicate more effectively.

We are proud of the challenges and opportunities our qualifications provide. It's because of this that our candidates, people just like you, go on to become the most confident communicators and highly-skilled professionals.

2020 has been a challenging year for us all. Like many other businesses, Signature has adapted to a new way of working. We are stronger than ever, and continue to be the leading awarding body for deaf communication qualifications.

We have been working on offering online assessments to our learners. This is an exciting development for us, and we're sure you'll agree that this will provide enhanced accessibility for everyone going forward.

From everyone at Signature, we hope that you enjoy studying with us, and we wish you luck in your future exams.

# An introduction to Signature

---

## "Signature is the leading awarding body for deaf communication in the UK"

At Signature, we are passionate about improving communication between deaf, deafblind and hearing people, and creating better communities in the process. We want to make sure that deaf and deafblind people have the same opportunities as everyone else, and the same access to education, employment and services.

We employ highly skilled people and experts such as staff, consultants and suppliers to make sure that our centres and learners gain the strongest qualifications on the market, and receive the best customer experience.

It is by offering these qualifications that we can help to make sure the standard of support that deaf people receive is the best it can be.

Working regularly with expert consultants and native BSL users means that our assessments have the highest quality of language and content.

# Level 3 in British Sign Language

---

By studying Level 3 in British Sign Language with Signature, you will further develop your skills in BSL and become a competent communicator. Building upon the vocabulary and grammar learnt within level 1 and level 2, learners will be able to understand and use varied BSL in a range of work and social situations.

## Qualification structure

Candidates must demonstrate both receptive and productive BSL skills at level 3, and in all of the six topics that make up this qualification.

Assessments may cover any of the topics listed in this qualification. The natural context of using BSL is in two-way interactions (discussions, conversations, debates etc.), as well as one-way interactions (monologues, presentations etc.). The candidate is therefore expected to demonstrate receptive and productive skills in both two-way and one-way interactions.

## Qualification objectives

Successful completion of this qualification can be used as evidence of the language skills needed in order to be able to operate independently and at an advanced level in the target language.

It is useful for those who work on a regular basis with Deaf people (for example social workers, teachers of the Deaf, communicators, voluntary workers, workers within Deaf organisations, schools, etc), those who aspire to work in these contexts, and those who wish to expand their knowledge and skills in British Sign Language.
